

## Data Vocabulary (Unit 2)

**Line plot -** a graph that uses **X** or **✓** to show amounts. Line plots should have titles and labels for the bottom (axis) numbers

**Minimum –** the smallest number found  
*Example: minimum = 2*

**Maximum –** the largest number found  
*Example: maximum = 7*

**Range –** the difference between the maximum and the minimum. (Maximum – Minimum = Range)  
*Example: range = 5*

**Estimate –** an educated or “smart” guess
